Top Skills

OpenAI API, OpenAI Agent SDK,
LangGraph, RAG.

Python, Advance SQL, PowerBI,
Tableau.

Snowflake, DBT, Data Bricks.

Certifications

IBM EDA for Machine Learning
AWS Certified Cloud Practitioner
Presenting Using Story

HARSHITH HS

Data & AI Engineer | dbt · Snowflake · BigQuery · Airflow | LLM ·
LangGraph · OpenAI Agents SDK · RAG
Greater Melbourne Area

Summary

Data and AI Engineer with 2+ years of commercial experience in Melbourne — building production data pipelines, NLP systems, and agentic AI applications. I've shipped end-to-end solutions across the full data stack: ELT pipelines (Snowflake + dbt + Airflow), cloud infrastructure (GCP, Azure), BI reporting (Power BI, Tableau), and ML/AI systems in production. Recent work: Built an Agentic Deep Research System — a multi-agent pipeline using LangGraph and OpenAI Agents SDK with a ReAct loop (Research Agent → Analyst Agent → Writer Agent) Built a Multimodal RAG Pipeline — LangChain, vector databases, and semantic document retrieval. Published NLP researcher — RMIT University (ML algorithms for microaggression detection in text) Core stack: Python (Pandas, NumPy, Scikit-Learn) · ETL pipeline · SQL · dbt · Snowflake · BigQuery · Airflow · LangChain · LangGraph · GCP · Azure · Power BI, Tableau · Git · Github. I am driven by the ambition to bridge the gap between intricate data insights and strategic business initiatives. My aim is to leverage my analytical skills and innovative thinking to make a significant impact on projects, fostering data-driven strategies that propel business growth. Open to work on Analytics Engineer, Data Engineer, and AI Engineer roles

Experience

Digital Software Consultancy

Data Analyst

June 2024 - November 2025 (1 year 6 months)

Flinders, VIC

- Delivered an end-to-end ELT pipeline (Snowflake + dbt) processing retail transaction data, reducing query runtime by 40% via incremental models and optimised SQL — code was reviewed and versioned via Git.
- Implemented dbt data quality tests and snapshot tables to detect anomalies, track historical changes, and maintain audit trails across critical business datasets – supporting compliance and data governance requirements.

- Performed ETL tasks and conducted exploratory data analysis using Python on sales data, extracting actionable insights on revenue trends, regional performance, and customer purchasing patterns to inform business decisions.
- Built interactive sales performance dashboards in Power BI (SQL-backed) tracking total sales, profit, revenue growth, and regional KPIs — eliminating 60% of manual reporting effort through automated refresh workflows.

Coles Group

Retail Operations Specialist

March 2024 - November 2025 (1 year 9 months)

Melbourne, VIC

Cultural Infusion

Data Analyst

July 2023 - December 2023 (6 months)

U2, 273-277 Wellington street, Collingwood, Victoria, 3066

- Processed and analysed text datasets to train an ML model for detecting workplace microaggressions, applying feature engineering, A/B testing, and hypothesis testing—improving detection accuracy by 25%.
- Implemented CI/CD pipelines using Git and automation tooling, reducing deployment time by 40% and establishing repeatable, quality-controlled deployment workflows.
- Designed Tableau dashboards to visualise model performance metrics and NLP insights, enabling leadership to track accuracy trends and make evidence-based decisions.

Mindstack Solutions Pvt. Ltd.

Junior Data Engineer

August 2019 - November 2020 (1 year 4 months)

Bengaluru

- Designed and optimised relational database schemas and advanced SQL queries, improving data integrity by 20% across operational reporting systems.
- Built ETL pipelines to streamline data processing workflows, increasing operational efficiency by 40% and reducing manual intervention in data preparation tasks.
- Automated system monitoring and alerting workflows using Python scripts, reducing incident response times by 30% — operating within a structured incident management process aligned to ITSM principles.

- Designed Power BI dashboards for executive reporting, providing operational KPIs and actionable insights to support business decision-making.

Education

RMIT University

Postgraduate Degree, Data Science · (February 2022 - February 2024)

REVA University

Bachelor's degree, Electronics and Communications Engineering

RMIT University

Master of Data Science
