HARSHITH HS

Data Analyst | Analytics Engineer | Generative AI | NLP | LLM |
Python • SQL • dbt • Snowflake • Power BI |
Greater Melbourne Area

Summary

Enthusiastic and results-driven Data Science graduate from RMIT University, with hands-on experience as a Data Analyst and Machine learning Engineer. Adept at translating a strong passion for learning and problem-solving into actionable insights for business processes. Actively seeking opportunities to apply my skills in data analysis, machine learning, and data-driven decision-making platforms.

Core: Data Analysis and Visualization, Business Analysis. Tool : power BI, Tableau, python, ETL (Extract, Transform and Load), Python (Pandas, NumPy, Scikit-Learn), Programming in R (Tidyverse, tidy models), Data Visualization, Power BI, SQL(MySQL), Natural Language Processing (NLP), Algorithms: Data Structure and Analysis, AWS Cloud Computing Services.

I am driven by the ambition to bridge the gap between intricate data insights and strategic business initiatives. My aim is to leverage my analytical skills and innovative thinking to make a significant impact on projects, fostering data-driven strategies that propel business growth.

Experience

Digital Software Consultancy
Data Analyst
June 2024 - November 2025 (1 year 6 months)
Flinders, VIC

Coles Group
Retail Operations Specialist
March 2024 - November 2025 (1 year 9 months)
Melbourne, VIC

Cultural Infusion

Data Analyst

July 2023 - December 2023 (6 months)

U2, 273-277 Wellington street, Collingwood, Victoria, 3066

As a Data Science Intern at Cultural Infusion, I had the privilege of working on a pioneering project that harnessed AI to detect microaggressions in text. Here's how I honed my skills and contributed to this transformative endeavor.

Key Skills: Deep Learning, Natural Language Processing (NLP), Data Collection and Sourcing, Exploratory Data Analysis (EDA), Feature Engineering, Model Evaluation and Optimization, Ethical AI Considerations, Collaborative Teamwork and Insights Reporting

Mindstack Solutions Pvt. Ltd.

Junior Data Engineer

August 2019 - November 2020 (1 year 4 months)

Bengaluru, Karnataka, India

Led the design and implementation of a relational database management system using SQL to support critical business applications and improve data integrity.

Developed Python scripts to automate system monitoring and alerting, reducing incident response time and ensuring high availability.

Prepared detailed technical documentation and reports outlining architecture. Effectively communicate with clients and comprehend their needs accurately.

Education

RMIT University

Postgraduate Degree, Data Science · (February 2022 - February 2024)

REVA University

Bachelor's degree, Electronics and Communications Engineering
